“WHAT TO DO WITH #2!”

POO DOO LEASH INTRODUCES THE HANDSFREE SPORTS CANINE LEASH AT SUPERZOO 2017!

NASHVILLE, TN - Poo Doo Productions (www.poodooleash.com) officially announced today they will be expanding their line of specialized pet products. The patent pending Hands Free Sports Canine Leash is a practical and stylish way to hold a roll of dog bags, personal items, and pet waste in separate compartments all sewn to a reflective leash. It may be used as a regular leash with a standard handle or as a hands-free leash as it attaches around your waste with a durable carabiner and double spaced webbing. You may also use your smart phone through the vinyl back pocket for several applications. In addition to texting, you can use your ‘light app’ as a flash-light for increased night time visibility. The Handsfree Sports Canine leash is available on-line, and at retailers throughout the US and Canada.

“The Handsfree Sports Canine Leash is the perfect complement for daily walks with your pet” commented CEO Rhonda Pinkerman. “On top of freeing up both hands, the compartments allow for the storage of personal items, dog bags, and pet waste making the users activities worry free and enjoyable. You’re not the one holding doggie doo, the Poo Doo Leash does it for you!”

Poo Doo is a custom pet product business here to make walks or runs more enjoyable for active dog owners.
