Tomlyn® Unveils Two New Veterinarian-Formulated Pet Health Products in Booth #3335 at SuperZoo 2019

FORT WORTH, TEXAS (June 21, 2019) – Expanding its line of veterinarian-formulated products for household pets, [Tomlyn® Veterinary Science](#), has announced the launch of two new products, Urinary Tract Health and Loose Stool Remedy — Firm Fast, which will both be unveiled in August at SuperZoo 2019.

Urinary Tract Health and Loose Stool Remedy will be available to distributors in August and later available to pet parents through online and in-store retailers in early fall 2019.

“Over the past year, we’ve been working to bring these two products to the Tomlyn product line and we’re looking forward to talking with our retail partners about the benefits during SuperZoo this year,” said Brittany Green, product manager at Tomlyn. “We try to provide pet parents with an assortment of animal health products that meet their needs, whether it’s something they use with their pets every day, or a product that helps manage conditions that come and go.”

The Tomlyn Urinary Tract Health is an easy to administer daily tablet that is available in both 30 count and 60 count. Suitable for both cats and dogs, the product helps maintain normal urinary tract function and supports healthy elimination.

“Our Urinary Tract Health contains compounds from cranberry extract that help keep bacteria from sticking to the lining of the urinary tract,” said Dr. Jen Kasten, technical services veterinarian at Tomlyn. “Spayed female dogs, older cats, overweight cats and male cats, as well as pets that are stressed or those that urinate in the house or outside the litter box, may benefit from daily use of the product.”

Available in both gel (15 cc and 30 cc) and tablet (10 count), Tomlyn’s Loose Stool Remedy helps cat and dog parents manage occasional loose stools that can sometimes result from dietary changes or anxiety caused by travel, boarding, veterinary visits, thunderstorms, fireworks, new household additions and more.

“The Loose Stool Remedy can be used once loose stools are seen or even ahead of an inciting event, such as travel or boarding,” said Kasten.

Urinary Tract Health and Loose Stool Remedy will be available for viewing in the Tomlyn booth (#3335) during SuperZoo from August 20 – 22, 2019 at Mandalay Bay in Las Vegas, Nevada.
